

# CONTROLLERS

## Multi 5 Zone Dimmer Control Receiver Unit

- Safe and reliable full isolation design to dim switch single colour LED lamps
- AC dimmer, triac dimmable, 2 channels, 1.2A per channels output Minimum and maximum brightness (100%)
- Built in RF control interface
- Compatible with all remotes
- Push dim function while connected with push switch

310033  
12-36 VDC Input Voltage  
100-240 VAC Input  
100-240 VAC Output

## Remote Control Dimmer Switch with RF Signal

- 4 output channels separately dimming range 0.1-100%
- Gradual switch off, smooth dimming no flickering
- Built in battery up to 2 years, wireless remote with distance of up to 20 meters between switch and receiver
- 1 to 5 zones
- 256 level logarithmic dimming, more comfortable for human eyes

310034  
12/24 VDC Input Voltage

## Full Touch Pad Dimmer Control 4-Zones

- Full touch pad dimmer control for 4 zones separately with switch and dimming functions
- Ultra sensitive high strength tempered glass touch panel
- Smooth and accurate brightness adjustment 0.1-100%, no flickering

310042  
12/24 VDC Input Voltage

## Full Touch Pad Dimmer Control 2-Zones

- Full touch pad dimmer control for 2 zones separately with switch and dimming functions
- Ultra sensitive high strength tempered glass touch panel
- Smooth and accurate brightness adjustment 0.1-100%, no flickering

310043  
12/24 VDC Input Voltage

## Push Button Dimmer Switch Remote

- Smooth accurate dimming 0.1-100%
- No flickering
- Endless receivers in each zone
- Control distance over 20 meters
- Easy installation
- Battery up to 5 years
- One button for dimming and on off switch

310044  
12/24 VDC Input Voltage
